Key Features – Tank and Handle

- 35 litre solution tank and 23 litre recovery tank
- Front filling port with water filter and solution filter protection the pump

- Adjustable handle allows for positioning to suit operator height
- Handle includes integrated safety switch. The CEX410 will not operate unless this is pressed

Key features – Brush pressure and traction adjustment

- The brush pressure controls the machines movement and is adjustable by adjusting the height of the vacuum shoe (suction nozzle) with an indicator showing the current pressure.

Key features – Dashboard

- The dashboard is a simple three button display that controls all functions.
- To operate, set pump and vacuum buttons to on. The main button will start all functions but will not activate the brush or solution until the safety switch is pressed.
- To do double scrubbing turn off the vacuum button and keep working with the safety switch pressed
- To work with only brush turn both pump and vacuum off
- To work with only brush and vacuum turn only the pump button off

Key features – Parking stand

The CEX410 includes a parking brake to reduce the risk of damaging the brush.

- To activate, push gently down on the handle to lift the front of the machine and press the parking pedal with your foot to lower the parking stand before lowering the machine to park it on the stand.
- To release the parking stand simply lift and lower the front of the machine and the stand will self release.

Key features – Connection of optional accessories

Optional manual floor tool upholstery tool add to the versatility of the CEX410, providing the capability to use for

- spot cleaning of floors,
- cleaning of upholstery and
- access to hard to reach areas such as stairs.
